

“Outstandingly clean without sacrificing the beverage’s signature strength and big flavor.”

“Travel-friendly coffee products have flooded the market of late... the Travel Press from Espro might beat them all.”

VOGUE

“The best press pot I’ve ever used.”  
Wine Spectator

People

“ESPRO is, in a word, ridiculous. A double micro-filter gets one of the finest results we’ve sampled.”

BuzzFeed

“Tough enough to take camping but sleek enough for fine dining. This may be the last press you ever buy.”

ESPRO®

MAKE IT BETTER.™

**FRIENDS FOR LIFE,  
GUARANTEED.**

We design products that make better coffee, tea, and espresso, and are built to last. We guarantee it.

If customers are not satisfied with an ESPRO® product when they receive it, or if one of our products does not perform over time, they may return it to us for a repair, replacement, or refund. Damage due to improper use, lack of cleaning, or wear and tear will be repaired at a reasonable charge.

# IT'S A GREAT TIME TO BE A COFFEE & TEA LOVER.

We're in the midst of a renaissance. Blends are giving way to single varietals. Freshness is being carefully managed. The stories of the farmer and responsible agriculture are becoming known. Quality is being rewarded and consumers are becoming connoisseurs.

At ESPRO, we're proud to be a vital part of that movement.

We craft tools that help people make better coffee, tea, and espresso. We are obsessed with combining time-tested brewing techniques with technology and innovation to bring the form and function of our products to the highest ideal. We are dedicated to flavor and process and craft and creativity.

Everything we do supports coffee and tea lovers to make their best cup – simply, every day, all over the world.

That's what we mean when we say,  
**ESPRO MAKE IT BETTER**

# A PERFECT ENVIRONMENT FOR BREWING COFFEE & TEA

MAKE IT  
BETTER

The ESPRO Press is designed to take the customer's own carefully crafted preferences – the bean and roast, the leaf – and marry them with a perfected environment for brewing.

Two innovations are at the heart of the process. First, ESPRO's patented double micro-filter gives people the distinct, rich flavor they'd expect, without all the mess associated with a traditional press. And second, the design of the press and filters prevents over-extracted coffee or tea from entering the beverage once the plunger is pushed down.

For French-press coffee lovers, the ESPRO Press accomplishes what was previously impossible: deep and rich flavor, with all the aromatic oils, yet without any grit in their cup.

Pour-over coffee lovers get ultra-clean, oil-free coffee simply by adding our optional paper filters.

And tea lovers get perfect extraction that stops precisely, and that can easily be re-steeped multiple times without a mess.

THE INSIDE OF EACH ESPRO PRESS IS INTENTIONALLY CRAFTED TO CREATE BETTER COFFEE AND TEA:

ESPRO's patented double micro-filter creates the distinct, rich flavor of a press without any grit.

ESPRO'S patent-pending double tea micro-filter sweeps leaves into an isolated chamber to stop the brew.

Optional paper filters help re-create the flavors of pour-over coffee.

The design stops extraction on a dime. The buffer between the two filters and the fine filter mesh safely contain over-extracted coffee, so every sip tastes perfect.

Heat is meticulously retained, so flavor is precisely delivered and the brew stays hot.

Grinds and tea leaves are fully immersed during brewing, so extraction is perfectly even.

# APPARENTLY KNIGHTS STILL COME IN SHINING ARMOR.

ESPRO  
PRESS  
P7

The P7 is the king of all French presses, and the culmination of our efforts to design and engineer the ultimate way to make coffee and tea.

Unlike traditional glass presses, the P7 is built like a tank. The vacuum-insulated, double-walled stainless steel won't break, keeps beverages toasty for hours, and looks beautiful.

And under the hood you'll find ESPRO's patented double micro-filter, for the cleanest cup you can get.

It's so much more advanced than any other press on the market that many customers tell us it's the last coffee maker they'll ever buy. At least they saved the best for last.

**ACCESSORIES:** Coffee filter | Tea filter | Paper filters **FINISHES:** Polished Stainless | Brushed Stainless **SIZES:** 18oz | 32oz

# BEAUTY IS MORE THAN GLASS DEEP.

ESPRO  
PRESS  
P5

Brewing is a sight to behold. That's why we created the P5, so people can see the magic of the ESPRO Press at work.

The P5 takes the classic sophistication of a traditional glass French press and perfects it through design and technology. Simply put, the P5 is safer, is more durable, and keeps beverages warmer than other glass presses on the market.

We invented a patent-pending Safety Lock™ to completely secure the glass inside the steel cage, and finally eliminate the industry's issue of glass slipping out while pouring. We designed the German-made Schott Duran® glass to be 40% thicker than a traditional press. And we included our patented double micro-filter for a clean, delicious cup with none of the typical grit and mess.

**ACCESSORIES:** Coffee filter | Tea filter | Paper filters **FINISHES:** Polished Stainless | Copper **SIZES:** 18oz | 32oz

# BOLD. INNOVATIVE. FUN.

(AND THAT'S JUST THE PRICE.)

## ESPRO PRESS P3

We pride ourselves on innovation throughout our product line, even with entry-level models. The P3 achieves our goal of delivering ESPRO Press coffee and tea at an affordable price without ever compromising the quality of the brew itself. It's the perfect fit for a student or young professional looking for a less expensive option, as well as a heightened sense of style and fun.

We created the P3 with the same double micro-filter as our P7. We built it with the same durable Safety Lock™ glass as our P5. And we developed it with a lightweight, sturdy cage that's available in any color you want, so long as it's black.

**ACCESSORIES:** Coffee filter | Tea filter | Paper filters **FINISHES:** Black **SIZES:** 18oz | 32oz

# THE JOURNEY WAS OUR DESTINATION.

## ESPRO TRAVEL PRESS

There are people who will gladly hike miles with a heavy pack to the summit of the tallest mountains. Others might think nothing of being at sea, days from land. But of all the hardships people endure to see the world and seek adventure, we believe that going without a great cup should not be among them.

The ESPRO Travel Press is for people who love coffee and tea, and want to take it with them anywhere – whether they're

crossing the Amazon, or just trying to commute across an urban jungle. It's designed so they can brew their favorite cup right inside, seal it with the travel lid, throw it in their bag, and go.

Outside, its vacuum-insulated stainless steel keeps things warm for hours. And inside, the patented double micro-filter creates a clean and tasty cup that can only come from ESPRO.

**ACCESSORIES:** Coffee filter | Tea filter | Paper filters **FINISHES:** Matte Black | Stainless Steel | White **SIZE:** 12oz **CO-BRAND:** Available

# TOOLS FOR ESPRESSO ARTISTS.

A flawless espresso drink is an amalgam of the grind, the roast, the machine, the barista, and the barista's tools. It is a harmonic convergence, where no one element outweighs another.

There are coffee lovers who think about making the ideal espresso drink all day. They obsess over the grind. They spend hours working on their foam. In short, they seek perfection.

For every minute people obsess over making espresso-based beverages, we've spent an equal amount of time designing tools that balance human creativity and mechanical precision. Whether it's a tamper calibrated to deliver exactly the right amount of force every time, a pitcher that easily creates a perfect cyclone of froth and milk, or whatever we dream up next, ESPRO's tools are created for people who are artists at heart.

# SOMETIMES THINGS JUST CLICK.

## ESPRO CALIBRATED TAMPER

Our company began with a search for perfection and a desire to eliminate unknown variables from the brewing process, which led us to develop the ESPRO Calibrated Tamper, our very first product and patent. The Tamper replaces guesswork with precision by delivering an exact 30 pounds of force with a reassuring click every time.

Water will always seek the path of least resistance. ESPRO's Calibrated Tamper ensures that all the grounds are compressed uniformly and consistently, creating perfectly even resistance

against water pressure and ensuring full saturation.

By eliminating variations in tamping pressure, we've made it possible to ensure consistent espresso from barista to barista, hour to hour, day to day, with only the need for a simple grinder adjustment.

We designed the tamper with a stainless steel base and an anodized aluminum handle for durability, and it's available in a variety of sizes with both flat and convex bases.

**FLAT BASE SIZES:** 53mm | 57mm | 58mm | 58.35(VST) **CONVEX BASE SIZES:** 49mm | 51mm | 53mm | 57mm | 58mm

# PITCHER PERFECT.

## ESPRO TOROID PITCHER

Painters have brushes. Writers have pens. For coffee artists, there's the ESPRO Toroid Pitcher.

The Toroid Pitcher has a patent-pending shape that creates perfect milk flows and amplifies available steam. It's easy to see the milk circulating evenly on all sides for visual feedback. The shape and the flow encourage the techniques baristas need to create microfoam – bubbles so small they're practically invisible – while the embossed fill lines ensure they've got the precise amount of microfoam for each drink without any waste.

And when the artist is finally ready to craft the drink, the precise sharp spout allows baristas to pour with greater detail and closer to the surface than ever before.

**NEW for 2017:** We're launching a new 25oz Toroid Pitcher that's an essential tool for both semi- and full-automatic machines. It's designed to give baristas a hands-free way to fill all three common sizes (12oz, 16oz & 20oz) of automatic-machine lattes and cappuccinos, ensuring both consistency and efficiency.

**SIZES:** 12oz | 20oz | 25oz (Q3)

# MERCHANDISING MATTERS

ESPRO's products have features and benefits that set them apart from anything else on the market. It's important for a customer to appreciate those distinctions so they can make a purchase and love the product. To help, we've developed a comprehensive suite of merchandising support for you and your team.

## PACKAGING

Our new packaging system is designed to drive conversations about why ESPRO is different and how our products fit into the lives of coffee and tea lovers.

## COLLATERAL

Instruction manuals and other printed communications make it easy to understand the basics as well as advanced features.

## POINT-OF-PURCHASE DISPLAYS

Designed to complement ESPRO's packaging, our displays set the product apart and drive additional consumer interest.

## TRAINING & QUIZZES

Online training sessions and quizzes help your staff absorb critical product information and teach them how to connect the product with consumers.

## VIDEOS

Our five-minute master class will quickly turn your sales staff into experts about what sets ESPRO apart and why consumers should care.

## APRON CARDS

You've got the aprons, we've got the cards. These quick reference guides help answer FAQs and facilitate sales.

# STANDING BY OUR PRODUCTS, OUR WORD, AND YOU.

Everything ESPRO does – design, production, material selection, packaging, our guarantee – is part of our commitment to create superior brewing products. When you put ESPRO products on your shelf, you can be sure that you're selling quality and innovation that people will love.

## MAKE IT BETTER GUARANTEE

Simply put, our guarantee is the best in the industry. We stand by our products without reservation and we mean what we say.

## PARTS

Inevitably, some parts wear out with repeated use. We make it easy to get accessories so our products serve your customers for the long haul.

## DESIGNED & BUILT TO LAST

We've put years of thought into each ESPRO product, and we build them thoughtfully and responsibly.

## THE MATERIALS MATTER

Every element in our products is carefully considered. Stainless steel is used because it imparts no flavor and doesn't oxidize or degrade over time. Food-grade paper filters are the thinnest possible biodegradable material, so environmental impacts are minimized. Vacuum insulation is an ultra-light method of preserving heat that never deteriorates. BPA-, BPS-, and phthalate-free plastic meet the highest possible standard for food-grade plastic in the industry. They neither hold nor impart flavor, and pose no risk of leaching into food over time.
